Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5—7, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by MATSUSHITA REIKI KK [MATJ] (JP 2000121210 A). MTJ discloses an electrical connection device of a refrigeration compressor comprising a cabinet/cover 10, at least one support 8/20 for electrical and electronic components 24, 4/5; and a cap/cover 10 having an open side face delimited by an edge whose shape at least partially matches the shape of the side wall/compressor shell 1, the cap/cover being intended to be applied by its open side face against the side wall/compressor shell 1 of the compressor, thus forming a wall of the cabinet/cover 10, support 20 made of metal has holes and able to evacuate liquid residues. See Fig. 1-5 and the enclosed 4 sheets of translation in English language and abstract in the same language.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/827,344

Art Unit: 3744

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3-4, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over MTJ in view of McCoy (6,752,646) MTJ discloses the invention substantially as claimed as stated above. However MYJ does not disclose a convex cap. McCoy teaches the use of a convex cap 20 with a compressor for the purpose of enclosing and protecting electrical components. See Fig 1. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the cover of MTJ in view of McCoy such that a convex cap could be provided in order to enclose and protect the electrical and electronic components at then side wall of a compressor. Regarding claim 3 for seals, the mating surface of cover 10 and the side surface of compressor shell 1 being similar and in order to protect the electronic and electrical components enclosed by the cover 10, cover 10 should be closely fitted with the side surface of compressor shell 1, moreover the cover being made of plastic it is obvious that a sealing surface is provided with the cover 10. Regarding claim 8 for support made of plastic is an alternative to metal as chosen in claim 9 and it is an obvious choice of an individual skilled in the art to choose alternative material and there is no criticality or unexpected result from it. Regarding claim 10 for cap made of ABS;

Application/Control Number: 10/827,344

Art Unit: 3744

Page 4

the cover of MTJ being made of plastic it is obvious that the plastic is of the same family of ABS as both of them serve the sane purpose.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad Ali whose telephone number is, (571) 272-4806. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-4834

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
